Experience

Deloitte

July 2019 to Current

Strategic Risk Intelligence Consultant II

Houston, TX

- Managed a multinational team that is dedicated to performing ERP compliance system assessment globally. Cyndi has led numerous system assessment and is responsible for assessing potential business partnership readiness to comply with client's global guidelines.
- Led and completed approximately 35 projects varying in size per year while managing around 8-10 projects at once. Furthermore, Cyndi worked extensively with dashboards creation and monitoring to track project progresses and results.
- Collaborated cross-culturally with teams from China, Hong Kong, South Korea, Taiwan, UK and Mexico, while travelling to lead local teams in onsite forensic interviews with third party vendors on behalf of large technology firms.
- Assisted client senior leadership managing \$800 million investment portfolio by performing various scenario analysis (Payback Period, IRR, NPV and ROI), and developed robust macro-based reporting dashboard to maximize efficiency.
- Analyzed data from various business cycles using SQL Server for clients to identify potential recoverable opportunities in areas of pricing incentive claims (i.e. volume rebates, special pricing discounts, MDF, etc.).

Deloitte

July 2018 to June 2019

Business Risk Management Consultant

Houston, TX

- Conducted workshops for key business processes to identify risks and controls to develop Risk-Control Matrices.
- Supported IT walk-through and documented understanding of IT environment including in-scope applications and company's processes around access security, change management, data center, network operations, and backups
- Programmed archiving tool using Python to streamline archiving process and reduced work-stream effort by 80%.

KPMG Ignition Data Center

January 2018 to May 2018

Data Analyst Intern

Denver, CO

- Automated clients' daily procedures by developing macros with VBA to increase business effectiveness and efficiency.
- Evaluated and streamlined clients' workflow utilizing Alteryx to improve their data organization and resource usage.
- Generated reports along with data visualization dashboards by analyzing and interpreting clients' data using Power BI and Tableau to recommend clients on strategizing and to achieve maximum profitability.

Macquarie Group

May 2015 to August 2015

Summer Business Analyst

Houston, TX

- Managed settlement, corporate action, funding, and other ad hoc tasks by using Macquarie's internal software.
- Reconciled US customer portfolios to comply with the legislative requirements under the Dodd Frank Act.
- Investigated and successfully resolved discrepancies and breaks both internally and with counterparties.
